Ciputat Timur, Banten

Informatics Engineering graduate from Syarif Hidayatullah State Islamic University Jakarta specializing in AI and Computer Vision. Experienced in engineering sophisticated Deep Learning architectures for gesture and audio recognition. Proven track record in leading tech-focused organizations and managing cross-functional teams to deliver impactful digital programs. Adept at bridging the gap between technical research and scalable application development.

EDUCATION

Syarif Hidayatullah State Islamic University Jakarta - South Tangerang

Aug 2022 - Feb 2026

Bachelor of Informatics Engineering (S.Kom), 3.63/4.00

- Core Focus: Artificial Intelligence, Computer Vision, and Data-Driven Systems.
- Thesis/Research: Comparing Bi-LSTM, Hybrid LSTM-GRU, and Transformer Encoder for Hijaiyah Sign Language Recognition with an accuracy of 97.54%.

WORK AND ORGANISATIONAL EXPERIENCE

Kementerian Agama RI LPMQ

Jul 2025 - Oct 2025

AI Engineer Intern

LPMQ Kemenag RI is the authoritative institution for Qur'an standardization and publication in Indonesia. It actively promotes Qur'an digitalization through platforms like Qur'an Kemenag, and explores the integration of AI to support sign language accessibility and inclusive religious learning.

- Deep Learning Development: Engineered an automated classification system for 112 Hijaiyah sign language classes using Bi-LSTM, Hybrid LSTM-GRU, and Transformer Encoder.
- State-of-the-art Accuracy: Achieved 97.54% accuracy via Multi-Head Self-Attention mechanisms, optimizing model robustness for the Digital Sign Language Qur'an.
- Computer Vision Pipeline: Leveraged MediaPipe Holistic to extract 75 skeleton-based keypoints from a primary dataset of 44,697+ frames in real-time.
- Data Engineering: Managed complex preprocessing including Stratified Random Sampling and Min-Max Scaling to ensure dataset integrity.

GDGoC UIN Jakarta

Nov 2024 - Aug 2025

Co-Lead

Google Developer Group on Campus is a program for university students. Designed to helping students bridge the gap between theory and practical.

- National Excellence: Spearheaded the chapter to become the #1 Most Active & #1 Most Impactful Chapter in Indonesia with 55+ technical events and 500+ members.
- Operational Excellence: Achieved a 9.5/10 satisfaction rate and 93% retention rate through data-driven program management.
- Strategic Leadership: Managed a cross-functional core team of 20+ leads across AI, Web, and Android tracks.

Young On Top Jakarta

Jan 2024 - Dec 2024

Head Division Technology

The YOT community is present throughout Indonesia, accommodating more than 700,000 young people, which is the largest youth community in Indonesia. YOT has 6 program pillars that underlie all YOT activities

- Project Orchestration: Led INTUTIVA (UI/UX Competition) with 500+ participants and established partnerships with industry-level judging panels.
- National Representation: Selected as the Master of Ceremonies for YOTNC 2024, hosting Indonesia's largest youth summit.
- Team Leadership: Directed a technology division of 30+ members, facilitating monthly technical workshops and industrial mentorships.

PROJECT & ACHIEVEMENTS

Korea-ASEAN Digital Academy (KADA) | Practical AI Development & Application

Feb 2026 - Apr 2026

Participant

- Selected Fellow in a competitive Korea-ASEAN program focused on end-to-end digital and AI solutions.
- Full-Stack Development: Hands-on experience in backend, web systems, DevOps (CI/CD), and LLM applications.
- Capstone Event Analytics System (Backend & AI Engineer), built a dynamic form builder with MongoDB to support flexible, scalable survey schemas. Developed backend APIs for real-time data collection and processing. Created an LLM-powered analytics module to generate key insights, opportunities, and improvement recommendations from survey data.

ElevAlte with Dicoding

Jan 2025

Awardee & Participant

Training Program Artificial Intelligence (AI) from elevAlte with Dicoding Program 2025

- **Selected Awardee:** Selected as one of the participants for an intensive AI training program, focusing on industry-standard Machine Learning and Deep Learning workflows.
- **Comprehensive Curriculum:** Completed advanced coursework in Machine Learning, Deep Learning, and Neural Networks, covering end-to-end model development from data collection to deployment.
- **Technical Mastery:** Gained hands-on experience in implementing optimization algorithms, loss functions, and data augmentation techniques to improve model generalization.

Datathon 2025 by Ristek UI

Jul 2025

Participant

- **Audio AI Innovation:** Developed a 1D-CNN model with 90% accuracy to detect auditory-induced meltdown risks in individuals with autism.
- **Feature Engineering:** Leveraged Librosa and MFCC for complex audio signal transformation and noise reduction.
- **End-to-End Pipeline:** Spearheaded the preprocessing and feature extraction pipeline for a 3-member development team.
- **Model Validation:** Audited system reliability using a multi-metric approach (Confusion Matrix, Precision, Recall, F1-Score).
- **Tech Stack:** Python, 1D-CNN, MFCC, Scikit-learn, Librosa.

Digital Skill Fair Dibimbing

May 2025

Awardee & Participant: AI and Machine Learning

- **Intensive AI Exploration:** Selected to participate in an intensive bootcamp-style program focused on the practical application of AI and Machine Learning in industry settings.
- **Industry-Relevant Skills:** Gained hands-on experience in building predictive models and exploring various machine learning algorithms to solve data-driven business problems.
- **Advanced Data Handling:** Practiced end-to-end data processing workflows, from exploratory data analysis (EDA) to feature engineering and model evaluation using Python-based libraries.

Skills, Achievements & Other Experience
• Achievements (2026): Korea-ASEAN Digital Academy

- **Achievements** (2025): Data Analytics Essentials
- **Achievements** (2025): Introduction Data Science
- **Achievements** (2024): Endpoint Security
- **Achievements** (2024): Python Essentials 1
- **Achievements** (2023): AI Basics
- **Tech Stack:** Tech Stack: Python, TensorFlow/Keras, MediaPipe, OpenCV, Scikit-Learn, SQL, Librosa.
- **Hard Skills:** Deep Learning, Computer Vision, Audio Intelligence, LLM, Data Handling & Preprocessing, Documentation & Research
- **Soft Skills:** Strategic Leadership (30+ Members), Public Speaking (National MC), Project management, and Adaptability
- **Tools:** Git/GitHub, Google Colab, VS Code, Jupyter Notebook, Figma.
